

Specialized Training Providers

Per regulations, a specialized training course is defined as a college level course providing at least **36 contact hours of training** in drinking water or wastewater quality, drinking water or wastewater treatment, drinking water distribution or drinking water or wastewater facility operation, offered by an accredited academic institution or an organization either accredited by the International Association of Continuing Education Training (IACET) or an authorized IACET provider. The following list represents courses the State Water Resources Control Board (SWRCB) has reviewed and previously accepted as specialized training courses for our drinking water distribution and treatment exams. If a course is not / no longer at least 36 hours, **or if it is an exam prep course**, it will not be accepted as a specialized training course. For reference, 3.6 Continuing Education Units is equivalent to 36 contact hours. **Please verify course length before committing to the class.**

An "X" in the **DWT** column means the course counts as a drinking water treatment (DWT) OR a DW distribution course.
An "X" in the **WSP** column means the course counts as a water supply principles (DW distribution) course.
An "X" in the **SUPPL** column means the course counts only as a supplemental course required for Grade 3-5 exams.

Some providers are noted as "NOT CURRENT" and may no longer be offering specialized training courses.
Any courses listed in RED are "archived" and no longer offered by the provider but are still acceptable for exam qualification.

ONLINE COURSES	IACET PROVIDERS
American Water College	CA-NV-AWWA Water College
Cañada College	CRWA Academy of Water Education
Michigan State University	OCT Water Quality Academy
Verified Group Educational Services	Golden State Water Company (NOT CURRENT)
Water Operator Association	Mitch's Certification Classes
CORRESPONDENCE COURSES	Water Industry Training Specialists
Office of Water Programs, CSU Sacramento
